

POROUS METAL BREATHER-VENT-FILTERS

allied witan company

Male - 10-32 - 2"

Female - 1/8" - 1/2"

TOUGH, INEXPENSIVE AND LOW-PROFILE

- Suitable alternative for spaces too small to accommodate standard Porous Metal Filter-Mufflers
- Compact unit in standard porous bronze in 90 Micron is most often used as a breather-vent-filter for cylinders, gear boxes, crank cases, storage cases, storage tanks, and other vessels where pressure equalization is required
- Modifications are available using Stainless Steel, Brass, other microns, or highly porous screen media to allow for unrestricted flow while limiting infiltration of unwanted objects
- Recommended for pressures up to 125 psi (8.6 Bar)

Male 90 Microns - Porous Bronze Disc

Conn Size	Model Type	NPT	BSPT	Dimensions
